LIST OF HEMEROCALLIS SEASON 1934

KENWOOD IRIS GARDENS

Mrs. J. F. Emigholz
Montgomery & Euclid Roads

Konrad Modschiedler
R. R. #10, Cincinnati, Ohio.

There has been an increasing interest in Hemerocallis, commonly known as lemon or day lilies. The recent hybrids are quite an improvement as to size, form and color. Due to their ease of growth, freedom from disease and delightful fragrance, they have rapidly gained great popularity. They grow well in halfshade and are especially desirable for their long season of bloom. By a judicious selection of varieties, you can have them in bloom from May to August. Hybridizers are watching some varieties that promise to develop into fall bloomers. These would be a welcome addition to the hemerocallis family.

The following list comprises the best hybrids of the well known hybridizers, Dr. Stout and Mr. Chas. Betscher, besides some other desirable varieties. The Betscher hybrids are numbered as to their color tones, 1 - 7 are different shades of yellow varying from a delicate pale yellow to the deeper shades of golden yellow; from 8 on the color tone is more orange, which is intensified in some var.

It is known that hemerocallis will bloom even under the hottest and driest conditions, thus forming one of our most valuable summer bloomers. While they will grow under almost any condition, they will respond to enrichment of the soil and watering during dry weather, by producing larger and better flowers. The roots should be planted about 3 inches deep, spreading them out, and firming the soil well over them. Hemerocallis can be reset locally almost any time, but for shipping purposes can only be sent in spring and early fall.

STRONG SINGLE DIVISIONS WILL BE FURNISHED POSTPAID

Mr. Betschers Hybrids

- | | |
|--|--------|
| 1) LEMONA. 42" June-July. A graceful pale lemon yellow with long segments | \$.75 |
| 2) MODESTY. 30" June-July. Light lemon yellow with long reflexing segments | 1.00 |
| 3) LEMON KING. 48" June-July. A trifle deeper in tone than Modesty. The heavy wax-like petals have a decided raised mid-rib and the whole flower is slightly crinkled. | 1.00 |
| 4) MRS. W. H. WYMAN. 42" July-Aug. A glistening light yellow variety, with broad and overlapping petals. A variety of great garden value, and one of the last to bloom. | 1.00 |
| 5) ANNA BETSCHER. 36" July-Aug. A smooth, large light golden yellow, deepening in tone at center. An open flower with broad, glistening & overlapping segments. | 1.50 |
| 6) J. A. CRAWFORD. 42" June-July. Large apricot yellow, shaded light cadmium in the center. Very open flowers with long and crinkled segments | 1.00 |
| 7) MARY FLORENCE. 36" June-July. New, just introduced. The large, wavy edged petals of apricot buff have a decided pink undertone. An outstanding variety, differing from all others, noticable even at a distance. | 2.50 |
| 8) THE GEM. 30" June. Light orange yellow, with good substance. A real gem. | 1.00 |
| 9) MRS. A.H. AUSTIN. 36" June-July. Bright golden yellow, paler at edge; large smooth and overlapping segments. | 1.00 |
| 10) J.R. MANN. 36" June-July. Fairly large, light cadmium yellow. Petals crinkled and slightly overlapping. Fragrant. | .75 |
| 11) AMARYLLIS. 36" June-Aug. Very large and broad overlapping petals of light cadmium yellow, slightly deeper in the throat | 1.00 |
| 12) D.D. WYMAN. 30" July-Aug. A dull golden yellow, with a tawny flush in the center of the petals. | .75 |
| 13) GOLDEN DREAM. 42" July-Aug. Fine smooth petaled variety of a deep golden tone, with slightly recurving segments. The largest and tallest of its color range, displaying fragrant flowers at the end of the season. | 1.00 |

- 14) GOLDENI. 30" June-July. Lovely smooth deep orange flowers, similar to the color of Baystate, yet differing in form. Segments are narrower & more open 1.00
- 15) BAY STATE. 36" June-Aug. Firm texture, deep golden orange flowers. Large overlapping segments, that form a cup shaped flower. 1.00
- 16) CRESSIDA. 36" June-July. Bright saffron yellow, very golden in tone. Long open segments. 1.00
- 17) GYPSY. 24" July-Aug. Deep orange yellow, with pale brown flushings at the edge. The broad petals overlap at the base and open recurving. .75

OTHER FINE VARIETIES OF HEMEROCALLIS

- APRICOT. (Yeld) 24" May-June. Broad, widely open segments of a light cadmium yellow. A fine early, free blooming variety. .35
- AURANTIACA. 36" July. Good sized flower of orange yellow .35
- CALYPSO (Burbank) 42" July-Aug. A large pale lemon with open, narrow segments. Very fragrant. Blooms at night, but remains open on cool days. .50
- CINNABAR (Stout) 30" July. Center clear cadmium yellow, outer half of recurving petals sprinkled with rose brown. General color brownish red. 2.00
- DR. REGEL. 24" May-June. Pure orange yellow, very fragrant. Medium sized flowers, produced freely early in the season .25
- DUMORTIERI. 24" May-June. Bright cadmium yellow. .25
- FLORHAM. 42" July. Large trumpet shaped flower of rich golden yellow. .35
- GEO. YELD (Perry) 36" June-July. Considered one of Mr. Perry's most beautiful hybrids. Large open segments of rich orange, flushed and mottled orange scarlet. 2.00
- GOLD DUST. 24" May-June. Fairly large flowers of empire yellow, reverse bronze. .35
- HYPERION (Mead) 40" July-Aug. Very large & broad petaled flowers of soft canary yellow, with a waxy firm texture. 3.00
- KWANSO FLORE PLENO. 42" June-Aug. Large double coppery orange flower of great garden value. .35
- KWANSO FL. PL. FOL. VARIEGATA. Similar to the above, but with white striped foliage. Quite rare and striking. 1.50
- LUTEOLA MAJOR. 36" July-Aug. Free flowering orange yellow with broad, overlapping petals. .75
- MARGARET PERRY (Perry) 48" June-July. Well branched spikes of brilliant orange scarlet, lined with yellow and center yellow. 2.00
- MIKADO (Stout) 24" June-July. A large striking flower of rich orange, with the center of each petal blotched ruddy purple red. Quite distinct. 1.75
- MINOR. 18" May. A slender variety, especially adapted for rock garden or front border. Fl. pale lemon chrome. .75
- RADIANT (Yeld) 36" A clear pure orange of great beauty and purity of color. Large and broad segments. 2.50
- SIR MICHAEL FOSTER. 36" Heavy, graceful foliage; stout stems bearing large apricot-yellow flowers, petals ruffled; sepals tipped with deep orange. 2.50
- WAU-BUN. (Stout) 30" July-Aug. Uniform shade of cadmium yellow; outer half of petals overcast delicate fulvous red. Broad, large petals that recurve gracefully. 2.00

COLLECTIONS: Any 3 of var. listed at \$1.00 for \$2.50; 3 of 75¢ var. for \$2.00 3 of 35¢ var. for 90¢; 3 of 25¢ var. for 65¢. 1 each of Dr. Regel, The Gem, Lemona, J.A. Crawford & Bay State, giving a succession of bloom from May to August, listed at \$5.00 for \$3.50. 1 each of Apricot, Calypso, Gold Dust, and Kwanso Flore Pleno & Luteola cat. \$2.50 for \$1.75. 6 or more of var. at price of 5.

SPECIAL NOTE: Dr. Stout, Director of New York Botanical Gardens, has just published a very interesting and valuable book on Daylilies. He gives full descriptions of the various species, and practical points on their use and culture. The book contains a number of colored and half tone plates. Something you will need for reference. Price \$3.00 postpaid. Send cash with order.

SPERMATOPHYTES: DR. BROWN, a member of the New York Botanical Garden, has been studying the spermatozoids of the gymnosperms and angiosperms, and has found that the spermatozoids of the gymnosperms are more similar to those of the angiosperms than to those of the ferns.

[illegible]

...a number of colored and half-breed specimens were seen.
